

*These are our hands; The one in five who still stands.
Mental illness part of us; But know we will not be shushed.
We are your family and friends; Asking to break hurtful trends.
Discrimination we survive; With acceptance we will thrive.*

- T.C. Hogan

2010 Report to Our Community

Dear Friends and Neighbors,

The Montcalm Center for Behavioral Health is pleased to provide you with its 2010 Poster and Annual Report to Our Community. Again this year we focus on the issue of Stigma as a barrier for persons seeking mental health services. Watch for our anti-stigma awareness and educational activities in your local communities throughout the year.

As an organization, our mission has been to provide the residents of Montcalm County with effective and affordable mental health treatments in a recovery oriented environment. Over the past year we have continued to expand our efforts to involve consumers in every aspect of our service delivery system, as their input is invaluable and greatly improves our services. We also continued to add more evidence-based practices to our treatment and support service array, as these are shown to improve consumer outcomes and help make lives better. As a result of these efforts, achieving recovery is becoming easier for persons with mental illness—and at the end of the day, that is what matters most.

We offer our gratitude for the efforts of our Board, staff, consumers and other community organizations. Without the cooperation and combined efforts of the many caring individuals who support our cause, we could not have come this far.

Sincerely,

Kurt P. Peasley
Board Chairperson

Robert L. Brown
Executive Director

About Us

The Montcalm Center is a governmental non-profit Community Mental Health Authority established in 1966 to manage public mental health services in Montcalm County. Under contract with and funded by the Michigan Department of Community Health, we serve adults, children, and families who have serious mental illnesses and/or developmental disabilities in a confidential, person-centered environment with a focus on recovery.
